Installation Instructions

Cheap Staples

Software Dependencies ─────────────────────────

      Cheap Staples requires that you have **Python3** and the **Google Chrome** browser installed prior to running the program. Ensure you have both of them installed before continuing to installation.

      If you do not have any of these installed, you can get them from their websites:
   *Python 3   - https://www.python.org/*
          Google Chrome   - https://www.google.com/chrome/

## Installation ──────────────────────────────────

1) **Download** *CheapStaples* from the [Github repo](#)
   a) Press the green "<> Code" button to open a submenu
   b) Press "Download ZIP" to save the repository into your Downloads folder.

2) **Unzip** the folder you just downloaded.
   a) Open you file explorer (or finder on Mac) and navigate to your Downloads folder
   b) Right click on the folder **`cheap-foods-main`**, and select "Extract All". Save the unzipped folder to your Downloads folder.

Name	Date modified	Type

📄 cheap-foods-main.zip		

Open
Open in new window
Edit with HHD Hex Editor Neo

Extract All...
Pin to Start

3) **Run** `installer.py`

a) Open up command prompt (or terminal if on Mac)

b) Navigate to the folder you unzipped the folder into.

In this example, we have the folder saved in our Downloads folder, so we need to type:

`cd Downloads/cheap-foods-main`

Command Prompt

```
C:\Users\tnade>cd Downloads/cheap-foods-main

C:\Users\tnade\Downloads\cheap-foods-main>
```

If the folder is not saved in your Downloads, you'll have to know the path to it and use:

`cd INSERT/YOUR/PATH/HERE/cheap-foods-main`

c) Run the command

Type `python3 installer.py` to run the installer. This will install all the necessary libraries Cheap Staples needs to use in order to run properly.

```
C:\Users\tnade\Downloads\cheap-foods-main>python3 installer.py
```

If you're using an older version of python, retype the command using `python` instead of `python3`.
